# Our company

We are a global leader in the field of paints and coatings. From yachts and automobiles to skyscrapers and consumer electronics, we create everyday essentials to make people's lives more liveable and inspiring. Our colors and coatings are everywhere, providing decoration, durability and sustainability.

## Aerospace Coatings

When it comes to air travel, our market-leading products and technologies offer world-class functionality, performance, efficiency and value. As a dedicated industry partner, we provide global support and offer a wide range of solutions for manufacturers, airlines, and MROs.

## Our Markets

### Commercial Exteriors

The exterior of a commercial aircraft is an opportunity to showcase innovative livery designs and inspire feelings of confidence and safety in passengers. We work closely with the lead global OEM companies to develop state-of-the-art coatings trusted by airlines, MROs and manufacturers worldwide.

### Structural Coatings

Nothing is more important than providing protection against the many forces that act on aircraft during flight. Our structural coatings offer reliable protection against forces such as corrosion, structural flexing, and extremes of temperature, contributing to a sturdy airframe and a safe flight.

### Cabin Interiors

Aircraft interiors are critical differentiators for passengers travelling with our airline customers. Our product offering includes fillers, topcoats, and protective coatings used in the beautification and preservation of interior surfaces.

### General Aviation

The livery of a private aircraft is a reflection of its owner. That's why we work hard to develop durable and hassle-free coatings so that you can develop your own signature style with every color at your fingertips.

### Air Defense

Defense aircraft require the best defenses. Our air defense coatings provide protection of the highest calibre (along with unique functions such as camouflage and anti-infrared) to fighter planes and military carries around the world.

## Color Expertise

We take pride in providing essential color and go to great lengths to ensure reliability and consistency of color throughout the global supply chain, helping airlines and private aircraft owners achieve style and recognition. Our mastery of color allows us to provide our customers with advanced digital tools and a limitless palette, so they can set trends and maximize impact.

## Innovations

We are at the cutting edge when it comes to aerospace coatings and their application, always pushing the boundaries to achieve new standards of performance and sustainability. From waterborne, peelable and special effects coatings to base coat/clear coat systems and chromate-free technologies, we are long-established leaders in developing sustainable, high performance, convenient and cost-effective coatings.

## Global Capabilities

AkzoNobel is a global company to match a global industry. Whenever a plane is manufactured, our extensive distribution network is there to provide every kind of coating it needs, and wherever a plane touches down, our help is at hand. We are always ready to draw upon our worldwide network of customer support, training centers, technical expertise and sales support to ensure that your needs are met and your expectations exceeded.

# Sustainability without compromise

At AkzoNobel, we take pride in taking a leading role in global sustainability. For us, sustainability means creating shared value for all our stakeholders. It underpins our core principles and is our driver for growth, innovation and productivity.

We believe that by doing radically more with less, and working closely with suppliers and customers, we can achieve excellence in environmental responsibility. Our aim is to provide the best combination of performance and sustainability in our products.

As a leader in chromate-free technology and VOC reduction, we are continuously improving our aerospace coatings to help our customers reduce aircraft weight, improve fuel efficiency, and reduce emissions without compromising on quality.
