

Interpon A2000: Trim

Interpon A2000

Interpon A2000

For automotive trim components, **Interpon A2000** travels around the world to protect and decorate vehicles for the most demanding OEM manufacturers. Interpon carries the widest range of OEM approved powder coatings in the industry. Available in super durable polyesters and acrylics, **Interpon A2000** products are OEM certified and built to last. From silky smooth high gloss black topcoats to uniform textures; from metallic effects to soft matte coatings, **A2000** powders are designed for success.

All products are OEM approved (ask for specific approval documentation and TDS)

Interpon A2000 Exterior Trim

Pillars and appliques, roof racks, grille guards, bumpers, hitches, mirror housings, and wiper arms all require protection from the environment as well as being visually harmonious with the overall design of a vehicle. **Interpon A2000** products are there for all of these components and more. **A2201** powders are super durable (> two years Florida) and **A2202** are standard durable depending on the performance level specified by the OEMs. They are also chemical and corrosion resistant, protective against chipping from road debris, hardened against scratches, but flexible enough to handle always changing environmental cycles.

Innovation is at the heart of **A2000**. Interpon launched state of the art high gloss black products that achieve a new standard for exterior trim powder coatings. Available in polyester, polyurethane and acrylic, **Interpon A2000** achieves a super smooth appearance in a luxurious high gloss black with enhanced scratch resistance, UV durability, and OEM approvals. In addition, the benefits of **Interpon A2000** come with huge savings over a similar finish in a liquid base/clear system. For those who are committed to a true Class A appearance, especially **Interpon A2200** Acrylic high gloss finishes are for you.

Interpon A2000 also boasts a wide range and gloss and effect products. Interpon has the coatings and approvals to support the dynamically changing automotive landscape. Matte finish trim products are a mainstay for automotive OEM's around the world. Our ten, twenty and thirty gloss trim black products protect everything from pillars to roof racks to hitches, while our textured low gloss products provide a uniform finish that is both rugged and refined. All the OEM's in Europe, (eg. BMW group, VW group, Daimler Benz), in NAR (e.g. GM, Ford and Chrysler) and in Asia (Toyota, Honda, Nissan...) are working with our technical and design teams to select the most suitable solution for their trims programs. **Interpon A2000** products are OEM-tested tough and durable, and they are designed to protect for many years.

In addition, **Interpon A2204/2203** comes in an array of metallic finishes, which offer enhanced exterior durability with the economic value of a monocoat system. These advanced systems incorporate proprietary technology to protect and extend the life of these metallic monocoats. From sparkle silvers to softer metallics and typically in polyester technology, these **Interpon A2204/2203** products are moisture and stain resistant, chemical and chip resistant durable, and built to last in the most challenging environments.

Interpon A2220 Interior Trim

Interpon A2220 also covers interior vehicle components. In the softer hues and lower glosses typical for vehicle interiors, **A2220** products are available for any interior need. They also come in textures for a unique design look. These products are challenged less by the environment and are designed for both functional and decorative qualities. They are abrasion and impact resistant, moisture and humidity resistant, and UV durable all in technologies designed to be performance and value driven.

Interpon A2000 for Trim:

- Exterior and interior products
- Superior smoothness and leveling
- UV durable
- Scratch, chemical and chip resistant
- OEM approved
- Metallic and special effect textures
- Polyester; Polyurethane and Acrylics
