

## Interpon A4000: Wheels

# Interpon A4000

## Interpon A4000 Clearcoats

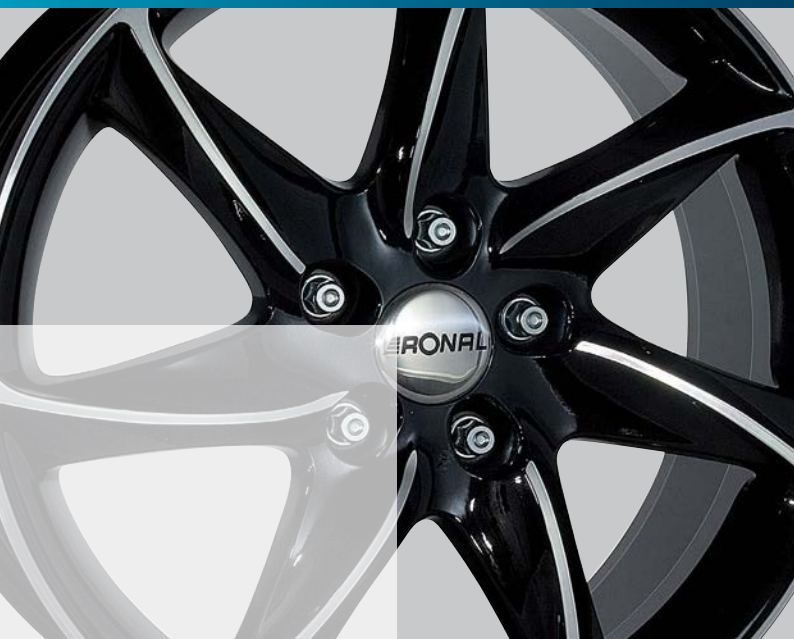

**Interpon A4740 acrylic clearcoat** is the OEM standard in the aluminum wheel market. With outstanding application consistency and film performance (approved by all major OEMs) **Interpon A4740 clearcoats** are the first choice for wheel makers around the world. **Interpon A4740 acrylic clears** combine Class A elegance and OEM specified durability in a super smooth finish with crystal clear transparency. The line of **Interpon A4741/ A4742 polyester clearcoats** also stand ready with excellent appearance and performance. Together they are perfectly balanced to provide long lasting protection from chipping, scratching, wheel cleaners and corrosive road environments. **Interpon A4700 clears** have more than 20 years of commercial success that make them the topcoat of choice for aluminum wheels.

## Interpon A4000

**Interpon A4000** offers a wide range of high quality powder coatings that will protect, enhance and decorate automotive alloy wheels. Choose from a specially formulated range of primers, basecoats and clearcoats for the best in total systems performance. The **Interpon A4000** range of powders will give you the lasting beauty of a Class A automotive finish while providing the ultimate in protection from bad road conditions. The superior performance and ease-of-use of **A4000 powders** result in increased production efficiencies and reduced rework rates which is essential to your business.

## Interpon A4700 Primers

**Interpon A4700** offers a complete line of primers. The foundation of any multi-coat system, primers have an essential job to do. Not only do they determine the final smoothness and appearance of the coating system, primers are the most efficient layer of defence against road debris and stone chipping that can penetrate the substrate and lead to corrosion.

**Interpon A4700 primers** have been formulated to work with a variety of base coats and curing conditions. They offer excellent levelling and smoothness while providing superior corrosion and chip resistance. **Interpon A4700 primers** are engineered to minimize outgassing, and they can be applied over a wide range of film thicknesses and application conditions to reduce defects and improve first run quality.

## Interpon A4720 Basecoats

These coatings developed specifically to meet the demanding specifications of automotive OEMs, **Interpon A 4720 powder basecoats** offer the quality, durability and protective advantages that come as standard with Interpon. Eliminating the need for a primer, **Interpon A4720 basecoats** are available in a range of bright, medium and darker metallics. With approvals from some global OEMs, **Interpon A4720 basecoats** are suitable for both the OEM and aftermarket.

## Interpon A4000 for wheels includes:

- Superior UV durability
- First rate transparency
- Scratch, chemical and chip-resistance
- Excellent smoothness and leveling
- Protection against out-gassing
- Metallic and Special Effect textures available
