

Product Data Sheet

AkzoNobel Powder Coatings Interpon A2201 YN213GF / 90-84-9927-2

Product Description	Interpon A2201 powders can be used for pillars and appliqués, roof racks, grille guards, bumpers, hitches, mirror housings, and wiper arms all require protection from the environment as well as being visually harmonious with the overall design of a vehicle. Interpon A2201 powders are super durable (> two years Florida) and answer to the requested performance level specified by the OEMs.		
Powder Properties	Chemical type:	Polyester super-durable	
	Area of usage	Automotive trim parts	
	Particle Size	Custom manufactured	
	Appearance	Smooth, matt	
	Colour	Volvo black, Daimler MB 9-275 Black KT, JLR Satin dark grey LPB	
	Gloss (60°)	9 - 13 GU	
	Density (g/cm3) 1,40 ± 0,05		
	Stoving schedule	15 minutes at 200°C (time at object temperature)	
	Application	electrostatic	
	Storage Stability	under dry, cool (<25°C) conditions, at least 24 months from production date	
Comment	performance and corrosi coating has average to g forming is required. YN2	ion protection when applied ov good flexibility, but is not recon 13GF is designed for applicati	coating, exhibiting very good weathering ver properly prepared metal substrate. This nmended for applications where severe post- ion on automotive exterior trim parts. Other coverage and gloss uniformity.
Comment Test Conditions	performance and corrosi coating has average to o forming is required. YN2 features include exceller The results are based or carried out under laborat	ion protection when applied ov good flexibility, but is not recon 13GF is designed for application at flow and leveling, good film of mechanical and chemical test	ver properly prepared metal substrate. This nmended for applications where severe post- ion on automotive exterior trim parts. Other coverage and gloss uniformity. sts which (unless otherwise indicated) have been for guidance only. Actual product performance wil

Interpon A2201 YN213GF / 90-84-9927-2

Steel surfaces to be coated must be clean and free from grease. For maximum protection it is essential to pre-treat components prior to the application of Interpon A2201 . Iron Phosphate and Zinc Phosphate of ferrous metals improve corrosion resistance. Aluminium parts require a chromate conversion pre-treatment.	
Interpon A2201 powders can be applied by manual or automatic electrostatic spray equipment. It is recommended that for consistent application and appearance product be fluidized during application. Unused powder can be reclaimed using suitable equipment and recycled through the coating system.	
This product is intended for use only by professional applicators in industrial environments and should not be used without reference to the relevant health and safety data sheet which Akzo Nobel has provided to its customers.	
IMPORTANT NOTE: The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advices given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product.
