## **Interpon D1036 Silky Texture**

#### **Product Description**

Interpon D1036 Silky Texture, part of the Interpon D1036 Texture range, is a series of standard durable powder coatings combining a very fine sand-blasted aspect with a soft and warm feeling. Interpon D1036 Silky Texture is specifically formulated without TGIC. It is intended for use on architectural aluminium and galvanized steel. Interpon D1036 Silky Texture has a better scratch resistance than many conventional systems.

As part of the Interpon D 1036 series of architectural powders, Interpon D1036 Silky Texture gives excellent exterior durability and colour retention and conforms to the requirements of all the major European architectural finishing standards. All Interpon D1036 Silky Texture powders are lead-free and meet the requirements of GSB Standard, Qualicoat Class 1, EN12206, and EN13438 (formerly BS6496 &BS6497) and AAMA 2603.

Qualicoat Licence number: P-0295 (France), P-0878 (Italy), P-0751 (Spain), P-1082 (Czech Rep.), P-0889 (Turkey) under the brand name Interpon D1036 Textured GSB Licence number: 136b (gloss 5) under the brand name Interpon D1036 Sablé

Powder Properties	Chemical type	Polyester		
	Appearance	Fine Texture		
	Gloss level	5-9 gloss units		
	Particle Size	Suitable for electrostatic spray		
	Specific gravity	1.2 – 1.9 g/cm <sup>3</sup> depending on colour		
	Storage	Dry, cool conditions (open boxes must be resealed)		
	Shelf life	24 months below 30°C peak temperature 12 months below 35°C peak temperature		
	Curing schedule (at object temperature)	20-40 minutes at 180°C 12-24 minutes at 200°C 8-14 minutes at 210°C		
Mechanical Tests	Flexibility	ISO 1519 (Cylindrical		
moonamoa rooto	. ioxioiiity	mandrel)	Pass 5mm	
	Adhesion	ISO 2409 (2mm crosshatch)	Gt0	
	Erichsen cupping	ISO 1520	Pass >5mm	
	Impact resistance	ISO 6272	Pass 2,5 Joules (reverse & direct)	
	<b>Buchholz Hardness</b>	ISO 2815	> 80	
Environmental and Durability Tests	Acetic acid salt spray	ISO 9227	<16 mm <sup>2</sup> corrosion/10cm (1000 hours)	
	Constant humidity	ISO 6270	No blistering, creep <1mm (1000 hours)	

Mortar Resistance   EN12206-2004   No effect after 24 hours		Sulphur Dioxide	ISO 3231	Pass 30 cycles – no blistering, loss of gloss or discoloration	
Mortar Resistance   EN12206-2004   No effect after 24 hours		Permeability		Pass 1 hour, no defects	
Accelarated Weathering ISO16474-2 (1000 hrs) ISO11507:1997		Chemical Resistance		Generally good resistance to acids, alkalis and oils at normal temperatures	
SO   SO   So   So   So   So   So   So		Mortar Resistance	EN12206-2004	No effect after 24 hours	
ISO2810 (1 year)  Colour change meeting of Standard and Qualicoat Class 1 requirements Chalking – none in excess of minimum in ASTM D659:1980  Test Conditions  Testing has been determined under laboratory conditions using the following applications properties and is for guidance only.  Substrate Aluminium (0.5-0.8 mm Al Mg1)  Pretreatment Chrome free Qualicoat/GSB approved pretreatment  Film thickness 70 – 90 microns (ISO 2360)  Cure schedule 12 minutes at 200°C (object temperature)  Actual film performance will depend on the individiual circumstances in which the product is used.  Pre-treatment  For maximum protection it is essential to pretreat components prior to the application Interpon D1036 Silky Texture.  Aluminium components should receive a full multi-stage chromate conversion coating suitable chrome-free pre-treatment or suitable pre-anodising to clean and condition to substrate. Detailed advice should be sought from the pre-treatment supplier.  Galvanized steel requires surface preparation by either multi-stage pretreatment using either zinc phosphate or chromate conversion or controlled sweep blasting. Depending on the type of galvanizing, degassing or use of anti-bubbling additives may be required follow the procedural advice of the pretreatment supplier.  Interpon D1036 Silky Texture products may also be used on cast or mild steel. For outdoor use, Interpon P2 anti-corrosive primer over a correctly prepared substrate in recommended.  Interpon D1036 Silky Texture powders can be applied by manual or automatic electrostatic spray equipment. For solid shades, unused powder can be reclaimed up a maximum of 20% using suitable equipment and recycled through the system. Plea consult AkzoNobel for further details as to the correct mixing ratio for virgin/reclaim powder.			ISO11507:1997	≥50% Gloss retention	
Pre-treatment Chrome free Qualicoat/GSB approved pretreatment Film thickness 70 – 90 microns (ISO 2360)  Cure schedule 12 minutes at 200°C (object temperature)  Actual film performance will depend on the individiual circumstances in which the product is used.  Pre-treatment  For maximum protection it is essential to pretreat components prior to the application Interpon D1036 Silky Texture.  Aluminium components should receive a full multi-stage chromate conversion coatin suitable chrome-free pre-treatment or suitable pre-anodising to clean and condition to substrate. Detailed advice should be sought from the pre-treatment supplier.  Galvanized steel requires surface preparation by either multi-stage pretreatment usin either zinc phosphate or chromate conversion or controlled sweep blasting. Depending on the type of galvanizing, degassing or use of anti-bubbling additives may be required follow the procedural advice of the pretreatment supplier.  Interpon D1036 Silky Texture products may also be used on cast or mild steel. For outdoor use, Interpon PZ anti-corrosive primer over a correctly prepared substrate in recommended.  Application  Interpon D1036 Silky Texture powders can be applied by manual or automatic electrostatic spray equipment. For solid shades, unused powder can be reclaimed up a maximum of 20% using suitable equipment and recycled through the system. Plea consult AkzoNobel for further details as to the correct mixing ratio for virgin/reclaim powder.		Exterior durability	ISO2810 (1 year)	Colour change meeting GSB Standard and Qualicoat Class 1 requirements Chalking – none in excess of minimum in ASTM	
Pretreatment Chrome free Qualicoat/GSB approved pretreatment  Film thickness 70 – 90 microns (ISO 2360)  Cure schedule 12 minutes at 200°C (object temperature)  Actual film performance will depend on the individiual circumstances in which the product is used. · · · · · · · · · · · · · · · · · · ·		Interpon D1036 Silky	<b>Fexture</b> powders should be ap	pplied at minimum 60µm.	

All powders can show small colour differences from batch to batch, this is normal and unavoidable. While AkzoNobel take every precaution to minimize visible differences, this cannot be guaranteed. Applicators and fabricators are advised to use a single batch for parts that will be assembled together. Differences are more likely with special effect powders.

Bonded products have better application properties than blended products (more stable) but attention should still be paid to line settings in order to avoid "marble effect" and changes in aspect after recycling. For more details it is suggested to read the *Metallic Application Guidelines*.

Different substrates (aluminium, steel, galvanized steel...), use of primer, and big changes in film thickness may give a different aspect.

Products with different codes should not be mixed even if same colour and gloss.

### **Post Application**

For specific advice on the suitability of post coating processes such as bending or the use of sealants, adhesives, thermal break, cleaning etc. please consult AkzoNobel.

#### Maintenance

For specific advice on Cleaning and Maintenance please consult the Interpon D series Cleaning and Maintenance Guidelines available from AkzoNobel.

#### **Safety Precautions**

Please consult the Material Safety Datasheet (MSDS)

#### **Disclaimer**

IMPORTANT NOTE: The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfil the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product.

Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advices given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product.
