BU Powder Coati	ngs	AlzaNaha	
Interpon F1500		AkzoNobe Tomorrow's Answers Today	
Designed for use on		tings formulated without the use of TGIC. iture, the single-coat finish offers excellent	
Interpon F1500 pow	ders are available in specific colo	our ranges and various gloss levels.	
Chemical type	Polyester		
Sales Code	M-series		
Particle Size	Suitable for electrostatic spray		
Specific gravity	1.3 - 1.7 g/cm ³ depending on cold	Dur	
Storage	Dry cool conditions below 25°C	(open boxes must be resealed)	
Shelf life	12 months		
Stoving schedule	15 - 30 minutes at 190°C		
(object temperature)	10 - 20 minutes at 200°C		
have been carried ou	t under laboratory conditions and d upon the circumstances under whic Mechanical tests: Gold Seal polis	shed steel	
.	Chemical & durability tests: Gold	Seal lightweight	
Pretreatment	Iron Phosphate		
	50 00 i		
	50 - 90 microns		
	50 - 90 microns 10 minutes at 200°C (object temp	perature)	
Stoving schedule		Derature) Gt 0	
Stoving schedule	10 minutes at 200°C (object temp

Max gloss change ±20% units

Product Description

Powder Properties

Test Conditions

Mechanical Tests

Pretreatment	Aluminium, steel or Zintec surfaces to be coated must be clean and free from grease. Iron phosphate and particularly lightweight zinc phosphating of ferrous metals improves corrosion resistance.	
	Aluminium substrates may require a chromate conversion coating.	
Application	Interpon F1500 powders can be applied by manual or automatic electrostatic spray equipment. Unused powder can be reclaimed using suitable equipment and recycled through the coating system.	
	It is recommended that Interpon F1500 be applied to a thickness of 50 – 90 microns.	
Safety Precautions	Please consult the Material Safety Datasheet (MSDS)	

FOR PROFESSIONAL USE ONLY

IMPORTANT NOTE: The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advices given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product.
